

Talk to your doctor or nurse before traveling to determine if it is safe for you to travel.

Do not travel unless you have:

- Medical approval
- Complete understanding of all of the risks related to your medical condition
- Complete understanding of all of the risks related to V.A.C.® Therapy.

Risk of bleeding during travel can have serious and potentially fatal consequences.

Once you have medical approval, you should have the following items with you during travel:

- Your prescription for V.A.C.® Therapy, which includes therapy settings and dressing supplies.
- Enough supplies (such as foam dressings, drape, tubing and canisters) for dressing and canister changes at the recommended time intervals or as needed.
- Dressing changes should be performed no less than three times a week.
- Canisters should be changed when full or at least once a week.
- An alternative dressing recommended by your doctor or nurse. This dressing would be used if V.A.C.® Therapy needs to be discontinued.
- A fully charged therapy unit and power cord.
- The V.A.C.® Therapy Unit User Manual and Quick Reference Guide.

WARNING: If therapy stops or the unit shuts off for any reason, call your doctor or nurse right away. Without active therapy, your dressing will need to be replaced within two hours.
